solutions 
components

We see more than just technology in our work in automation. We strive to take advantage of technological developments in automation, always taking into account human creativity and our environment in a resource-saving and sustainable way.

The Arcoz Team

Our offer

For decades, we have been a respected provider of products and total solutions for various industries. As a reliable partner and supplier of everything from individual components to complete turnkey solutions, we understand the challenges of both machine builders and end users.

Our products and services are specifically tailored to the needs of our customers and have been continuously optimised. Today, in addition to our extensive integration and special machine construction, we can also offer you a wide range of high-quality components and modules directly for mechanical engineering.

As a creative and innovative family business, we value trusting partnerships and are happy to assist you as consultants and implementers.

Our product partnerships

Discover a new era of excellence with us! We are continuously expanding our competences and technologies through specific cooperations with renowned companies.

We are particularly proud of our exclusive partnerships for distribution in Switzerland with these selected companies and their products:

- Cobots from Han's Robot Co., Ltd.
- SYZAX modular axis system from Opus SAS
- Transfer systems from Italplant SRL
