HARTMANN MATERIALS

Supporting your success

HARTMANN MATERIALS is an ISO –13485 certified stockholder, specializing in metallic semi-finished products for the Medtech Industry. Our main focus is on titanium. We are a member of the BIBUS Group, a Swiss family business, that is owner-managed in the third generation.

A broad range of customers turns to us for reliable and fast deliveries of top-quality titanium, cobalt-chrome and special stainless steel.

We work with renowned suppliers, most of which have been close partners of Hartmann Materials and our sister companies for many years. This ensures consistently high quality and reliability.

Services

We can compile customized packages of different materials from our stock range. Furthermore we also facilitate call-off orders and arrange just-in-time deliveries. We are supporting your success with a comprehensive range of machines and value-added services, including but not limited to plate sawing, bar sawing, shearing and waterjet cutting as well as re-stamping. Last but not least we regularly produce components in full accordance with the customer's drawings!

Global stock assortment

Our customers benefit directly from the strength of the BIBUS GROUP network. Not only do we maintain excellent relations to major manufacturers worldwide, but we also keep significant volumes of stock in multiple warehouse locations within our group. If we don't stock what you need, we can usually fall back on the stocks of our sister companies. We are almost always able to either deliver from stock or to quickly source the required items, keeping delivery times as short as possible.

Inhouse metallurgist

Customers appreciate the option to receive support beyond daily business. Our inhouse metallurgist offers support in materials selection for complex applications. Assistance can also be provided with regards to machining, fabrication, welding, and heat-treatment
