

maxon

Drive systems for robotics

Machine. Helper.
Rescuer. Friend.

Driving the evolution of robotics

maxon strives to accelerate the global deployment of robotics through high-performance and well-scalable integrated systems.

We develop and manufacture reliable components and actuators for autonomous mobile and industrial robots.

Thanks to our deep vertical integration, we offer highest performance, in-house manufacturing, and many customization possibilities.

Our robotics portfolio is driven by:

- Frameless Motors
- High Efficiency and Precision Integrated Robotic Joints
- Motors, Electronics and Sensors
