

Simply digitalizing industry

The smart digitalization solution for industrial companies.
Easy to implement with no programming required.

What are the benefits of iDIP?

Customer benefits

Digitalization made simple

With iDIP, digitalization projects in production and throughout the company can be implemented quickly, easily and with no need for programming knowledge.

Do it yourself

Solve your challenges independently and directly in production without having to rely on external service providers.

Overcoming the shortage of skilled workers

iDIP enables you to create an optimized, uniform tool interface for your employees. It also allows you to further automate and streamline your processes.

Just get started – and take it one step at a time

There is no complex IT deployment needed to get started with the iDIP platform. Simply install the software and away you go. Start small and digitalize one step at a time.

Optimize processes quickly and easily

Virtually all your digitalization needs can be met thanks to iDIP. Make adjustments and improvements at any time with ease.

Optimize costs

Development with iDIP is up to 100 times faster than with conventional software tools, enabling you to amortize your costs in a timely manner.

Save internal IT resources

The digital tool kit makes it possible to meet your identified needs without internal IT support.

Take a forward-looking approach

The iDIP solution is based on the latest technologies. It is web-based and can be used on all devices.

Customize software

The digital software tool kit lets you define what the solution should look like. There are no limits to what you can do.

How does iDIP work?

With iDIP, you can make your production processes fit for the future. The digitalization platform connects people, systems, processes and machines quickly and reliably via low-code/no-code development.

iDIP – the digital tool kit for your smart factory

What tasks can
iDIP perform?

Work instructions	Energy analysis and management	Production automation
System monitoring	Conveyor management	Production management
System visualization	Commissioning	Quality control & assurance
Order planning	KPI analysis and evaluation	Traceability
Operational data logging	Warehouse management	Maintenance and servicing
Dashboards	Intralogistics management	Central data hub
Digital worksheet	Machine data collection	And much more...
Efficiency analysis	Assembly instructions	

Your digitalization solution – smart and efficient

To set up your company to be smart, you need the right solution. iDIP is the ideal tool for introducing and implementing digitalization quickly and successfully in all areas of a modern industrial company. iDIP is a Swiss digitalization solution that can be implemented without the need for programming.

100% Swiss-made

iDIP is a fully Swiss software solution that takes digitalization to all-new heights at a time when skilled workers are in short supply. The tool can be installed and expanded without any programming knowledge. iDIP helps you to digitalize your production processes step by step, paving the way for huge progress in optimization. Due to the special structure of the platform, you can use the web solution via the app designer to create your own applications with input and information screens entirely according to your requirements.
