Witech
machines-outils

Swissmade

Our range of straightforward machines suited to your production at the most cost-effective price

Witech machines-outils **more than 30 years serving your production**

Our 3 to 5 axis machining center are intended to produce according to your needs with precision, reliability and flexibility.

603

Machining with 3 axes and 15 tools, benefiting from a very low space requirement.
Simple to use thanks to customised screens.
It allows you to machine, rework or engrave any type of part with precision and rigidity.

625

Machining with 3 to 4 axes simultaneously.
Tools changer with 96 or 120 places controlled digitally for rapid changes.
The stability and precision with a suitable machining capacity guarantees large production series.
The various robots associated with this center make it a major asset.

604

High-precision machining center. Configurable with 3 or 4 axes. Ideal for any machining requiring precision and repeatability.

Ability to work on top of and under the part. An optional guillochage'spindle can be installed. Tool changer with a capacity of 20 or 40 tools.

Optimized floor space.

Robotic adaptations can easily complement this center.

650

This 5-axis machining center combines milling turning and grinding operations for billet or short bar stock.

The highly robust mechanics, incorporating high-quality components, combined with a newly designed and innovative rotary tables, make this center an extremely efficient production tool.

Particular attention has been paid to the simultaneous management of all 5 axes.

Our machinery equipment is at the forefront of state of the art technology

Our range of custom machines is also available upon request.

Turning, decoration, band sawing, drilling, multi-spindle machining, etc.
